How Opsgenie compares to Jira Service Management

Atlassian acquired Opsgenie to help customers run their most critical services with alerting and on-call management. Today, we've built Opsgenie's operations capabilities into Jira Service Management, offering a complete incident management solution.

Benefits of migrating from Opsgenie to Jira Service Management

Jira Service Management offers everything you need for alerting, incident, problem, and change management.

- **Key alerting and on-call features**
  Get the same alert, on-call, and incident response features available in Opsgenie so you can keep your existing workflows and configurations.

- **Advanced IT operations management**
  Power operations workflows with AI-powered incident response and automation, and better visibility into your assets and services.

- **Comprehensive service management**
  Expand your capabilities with service request and knowledge management, including a virtual service agent. Enable collaboration across Dev, Ops, and business teams.

How Opsgenie compares to Jira Service Management

The table below summarizes differences between the capabilities available in Opsgenie and Jira Service Management. While Opsgenie offers strong alerting and on-call management features, and basic incident management capabilities, Jira Service Management is a comprehensive service management solution.
